

The MoneyWorks family of accounting software provides a range of feature rich but easy-to-use solutions for small-to-medium organisations. For over ten years MoneyWorks has been the accounting system of choice for organisations who demand a robust, high-quality accounting solution with a low cost of ownership. We chose to link our O'Doc family of products with MoneyWorks exclusively for these very reasons, plus MoneyWorks is designed from the ground up to be extendable, and to work with other packages such as FileMaker, our development environment.
